

ENERGY

Investing in American innovation to move us into a new energy future

Legislative Accomplishments

Congressman Moore has long been an advocate for responsible, renewable energy development so we can decrease our dependence on foreign energy sources:

- Supported the **American Recovery and Reinvestment Act**, which provides tax incentives for renewable energy and energy efficiency, invests in weatherization and promotes 'green' standards that will create new invest in new industries and jobs.
- Cosponsor of **Energy Independence and Security Act**.
- Hosted several **Energy Summits** throughout the district to discuss energy issues and possible solutions with his constituents.

Current Agenda

Congressman Moore is currently working on the following legislative items:

- **Promoting a comprehensive energy plan** that will not only focus on a wide variety of energy sources, including renewables and responsible domestic drilling, but also on strengthening our national security and growing our economy.
- Providing **tax credits to companies developing renewable energy** sources.
- Ensuring that our current energy policies are not placing an **environmental** strain on future generations.

President Obama

Congressman Moore will be working with the Obama Administration to develop a national energy policy that focuses on the following goals:

- Boosting the economy through the development of **alternative and renewable energy** sources, creating a new industry and thousands of jobs around the country.
- **Decreasing our dependence on oil** imported from Venezuela and the Middle East.
